# ABOUT US

Abba Metal Industries LLP is a leading manufacturing and exporting firm, focusing on manufacturing steel, plastic and rubber products. Our valuable customers are from electrical and automobile industries. With the support of competent teams, the entire array is produced using cutting edge technology. Our company is a well-managed firm with a dedicated quality control department. Under the guidance of our admin executive, we have attained tremendous success and growth in the export field. Our company inherent domain detailed knowledge, quick response and timely deliveries have ensured a number of loyal patrons in our client-base spread across India.

We owe our success to our sound infrastructure, which includes the latest-style and highly advanced manufacturing unit, testing laboratory, research & development wing and warehousing & packaging division. Enabling us to make continuous innovations and regular upgradations in our existing products, these facilities are equipped with state-of-the-art machines & technologies and are manned by experienced professionals. Our team members hold expertise in their respective fields and conduct their operations meticulously in order to manufacture a flawless range, exactly as per the specifications detailed by our clients.

# OUR SUCCESS MANTRA

Our flexible, scalable operations allow us to accommodate and work with changing market realities. Our dedicated and closely linked partner companies allow us to keep operating even in extremely volatile environments, keeping our Customers covered. With the keen application of our rich experience and expertise, we have been known as a reliable and dependable solution provider. Our commitment always remains to customer satisfaction in every respect, because only it has built us.
